Web Page:

As your next Representative, I have a vision for our district that will assist with the protection and progress of our community.

My vision focuses on two critical factors: Education and Sustainability.

EDUCATION must be cradled with respect for the students, teachers, families and administration in order for it to be a viable goal within our community. I promise to help eliminate the present 'Them vs. Us' mentality that continues the status quo that presently derails the system and leaves our students and teachers in limbo.

SUSTAINABILITY: My goal for District 40 is respect for the needs of the community while protecting our limited resources for future generations. I promise to provide my training and talents for the advantage of our community while reaching out to experts in the field for assistance to ensure that our district enjoys the best possible living and working conditions.

1. Ensure that the developers' fees for infrastructure are used for the establishment and maintenance of our community.
2. Implement a new concept that requires roads to be built before the homes and offices ensnarl traffic for the existing community.
3. Work for the release of state funds for schools prior to the groundbreaking of new construction.

My motto: "The more people believe in justice, the better for equality to be reality."
This motto will guide my service when elected to the Hawaii State House of Representative, District 40.

I ask for your vote and your support. Mahalo.
